

SHORE A HARDNESS TESTER

METERDI MR-DA7 / MR-DA7 WITH NABL

NABL

METERDI Shore Hardness Tester MR-DA7 is a handy and easy-to-use device to measure Shore hardness in soft materials like rubber, gum, plastic, and other non-metal items. It is ideal for testing soft rubber, elastomers, natural rubber, neoprene, casting resin, white PVC, leather, and more. If the test sample is too thin, place another piece of the same material behind it to increase thickness. This ensures accurate results.

Key Features

- Portable and lightweight design
- Clear, large digital display
- Comes with a protective plastic case
- Designed for Shore A hardness testing
- Easy to use

Range	0-100 Shore A	S P E C I F I C A T I O N
Resolution	0.5	
Accuracy	± 2	
Depth of indentation	0 mm-2.5 mm / 0 in-0.01 in	
Pressure force	1 kg / 2.2 lbs	
Indenter	35°	
Dimensions	80 mm x 60 mm x 25 mm / 3.14 in x 2.36 in x 0.4 in	
Power supply	1 x 1.5V (SR44)	
Weight	Approx. 300 g / < 1 lb	

Delivery Scope

- 1 x MR-DA7 Shore Hardness Tester
- 1 x Protective Carrying Case
- 1 x Battery (pre-installed)
- 1 x User Manual (English)
